FOSTERING TECHNOLOGICAL DYNAMISM: EVOLUTION OF THOUGHT ON TECHNOLOGY CAPACITY-BUILDING AND COMPETITIVENESS

Bibliographical References

GE.93-54094

Preface

In accordance with the work programme of the *Ad Hoc* Working Group on the Interrelationship between Investment and Technology Transfer adopted at its first session (25-29 January 1993) and endorsed by the Trade and Development Board at its second executive session, the UNCTAD secretariat has undertaken a comprehensive analytical review of the literature on technological capacity-building and on the role of technology in the international competitiveness of nations and their enterprises.

The present document contains the bibliographical references that have been examined in the preparation of the review, as well as document TD/B/WG.5/7, which has been submitted for consideration by the Working Group at its second session.
